

September 11 – 13, 2026 and September 18 – 20, 2026

The REGL Service Project – *CREATE LASTING IMPACT!*

This year your school team is part of a new project! This project will help middle school students who may not have the everyday essentials that they need. As we learned, we do not know what others are going through. So, the **Care Kits** (hygiene bags) you are assembling today will help make life a little better for a fellow student tomorrow. When your team arrives at school on the Monday after camp, please drop these off with your principal. Together you can then decide who should distribute these bags, whether it is the school nurse or counselor.

Now it is time to bring your REGL experience back to school! The goal is to show you how easy it is to assemble these bags at camp so you can plan a hygiene bag packing party when you return home. Reach out to the Rotary Club that sponsored you when you have a plan of action or need help. Your Rotary Club may want to provide pizza, help pay for the supplies, help deliver the bags, just to name a few—your team just needs to ask.

Another great thing is your team can decide who you want to create these bags for, if you want to continue helping your school or go out in the community--your team gets to decide! Here are just some ideas that your team can pick from and then choose the items that would be most needed in the bag:

- Veterans
- Humane Society
- Food Banks
- Women's Shelters
- Seniors and Elder Care Facilities
- Preschools
- Elementary and Middle Schools

The ideas are limitless, and your team can be creative on how to help your school or community. Today each of you, as part of your team, has started a positive impact at your school, do not let it stop there!
